SUMMARY

Product Designer with 10+ years of experience and 50+ shipped web and mobile (iOS, Android) products, from 0→1 MVPs to complex B2B SaaS platforms with 100,000+ users. I own the full design cycle — discovery, user research, information architecture, prototyping, design systems, handoff, and design QA — balancing business goals with user value and measuring impact through product metrics. AI-native workflow: I use Claude Code, Figma Make, and NotebookLM for research synthesis and rapid validation, and build working coded prototypes deployed via GitHub. Experienced in leading and mentoring designers and presenting design decisions to stakeholders, founders, and clients.

SKILLS

- **UX & Research:** user interviews, usability testing, product discovery, hypothesis validation, competitive analysis, UX audit, user personas, user stories, customer journey maps, user flows, information architecture, user-centred design, design thinking
- **UI & Design Systems:** wireframes, hi-fi prototypes, design systems, design tokens, UI kits, design patterns, interaction design, micro-interactions, data visualisation, dashboards, responsive web, iOS and Android (Apple HIG, Material Design), accessibility (WCAG)
- **Delivery:** design handoff, design QA, documentation, design review, close collaboration with developers, QA and stakeholders
- **Tools:** Figma (components, variants, Auto Layout, variables), FigJam, Figma Make, Sketch, Webflow, Hotjar, Miro, Lucidchart, Balsamiq, Photoshop, Illustrator, Jira, Slack, Trello, Asana
- **AI & Code:** Claude, Claude Code, Claude Design, ChatGPT, Gemini, NotebookLM, Gamma, Lovable, GitHub
- **Leadership:** team leadership, mentoring, stakeholder management, product ownership, decision-making, communication with international teams
- **Domains:** B2B SaaS, travel, engineering systems, logistics, education, healthcare, data interfaces, e-commerce, IP telephony, social networks and communication, scheduling platforms, sports (CRM)
- **Additional:** graphic, print and icon design, illustrations, infographics, presentation and landing page design, hand drawing, article writing

WORK EXPERIENCE

DataArt — Product Designer (UI/UX) Dec 2021 – Present

Product design for B2B and B2C clients in the EU and US, in both large and small teams: legacy redesigns and 0→1 products for responsive web, iOS, and Android.

- **B2B Booking Platform (EU):** redesigned a legacy B2B travel booking platform (100,000+ users) as one of 6 core designers, reducing the booking flow from 10 steps to 5 and cutting support tickets by 70%
- **Network Monitoring System (US):** designed data-heavy dashboards with charts and interactive maps for an internet provider's monitoring platform with role-based access, reducing manual engineering effort by 99%
- **Logistics iOS App (US):** designed an iOS app (Apple HIG) for managers and warehouse staff of a stage-equipment delivery company that replaced manual check-ins and status updates, saving 15 minutes per shift
- Built and maintained design systems and component libraries used across 7 products and 3 teams
- Introduced an AI-assisted workflow (Claude Code, Figma Make): working coded prototypes deployed via GitHub and handed off to developers, cutting validation time from weeks to days
- Ran the end-to-end process: requirements gathering, competitor analysis, UX audits, user flows, wireframes, clickable prototypes, high-fidelity design, design review, and design QA

Wildix — Product Designer Dec 2019 – Dec 2020

- **B2B Chat-Based Work Tool:** redesigned an outdated legacy collaboration tool for an EU-based IP telephony company — a messenger with calls, video, attachments and integrated telephony features — using a careful, iterative approach for a large existing user base
- Designed new products within the ecosystem from scratch: web and mobile messenger apps (React Native), intercom screens, remote-control interfaces, smart TV interfaces and Android in-car applications
- Created a design system from scratch and ensured consistency across multiple company products

- Ran UX audits, competitor analysis, storyboards and user scenarios, clickable prototypes and high-fidelity design in close collaboration with developers

Magic Powered — Product Designer Nov 2018 – Nov 2019
- Designed web pages and native iOS and Android apps for a social network start-up

Instasport — Head of UX/UI Dec 2017 – Nov 2018
- Led the design of a CRM system for sports club management from 0→1 within a 12-person team
- Launched the product to 43 sports clubs and 170 users

Halo Lab — UX/UI Designer Nov 2015 – Nov 2017
- Designed products for multiple start-ups and redesigned legacy products: management tools, chats, landing pages and website builders
- Created logos, branding, and illustrations

ADDITIONAL EXPERIENCE

Hillel IT School — UX/UI Mentor & Design Team Lead (EVO project) Mar 2018 – May 2018
- Led a design team; trained and mentored junior designers graduating from Hillel IT School

Odyssey Hackathon 2.0 (Nature), Groningen, Netherlands — UX/UI Designer 2019
- International, highly competitive hackathon in collaboration with a team from the USA and Ukraine

Odesa State Academy of Building and Architecture — Lecturer & Researcher Sep 2013 – Sep 2016
- Lectured and conducted research: 7 scientific articles and several national awards; built strong skills in critical thinking, structured writing, and public speaking

EDUCATION

Odesa State Academy of Building and Architecture, Ukraine 2006 – 2012
Master's Degree, Designer-Architect
